

## AIRTECHNO ENVIRONMENTAL TREATMENT

### Indoor air quality is a widely spread problem

Indoor air pollution is considered to be a no. 1 environmental health problem. Tightly sealed buildings and homes may be more energy efficient but can trap pollutants and microbes indoors causing odours, mould, allergies, and illness.

The Clean Air PHI technology has proven to drastically reduce airborne odors, mould, bacteria and viruses (in the 90+ percentile).

### Easy to use and stylish – from homes to offices and schools

- Clean Air Micro is perfect for private use, small offices, waiting rooms, patient rooms etc.
- Clean Air Mini is suitable for somewhat larger spaces: offices, classrooms, entrance halls, basements, etc.

Clean Air Micro and Mini units are either stand-alone or easily mountable on walls. Just plug in to a power outlet and start enjoying cleaner indoor air.

| Technical specifications | CLEAN AIR MICRO               | CLEAN AIR MINI                          |
